PROFESSIONAL SUMMARY

A motivated fourth-year Bachelor of Science in Computer Science student seeking an opportunity for On-the-Job Training (OJT) to apply academic knowledge, develop technical skills, gain practical experience, and contribute to an organization's goals.

EDUCATION

Bachelor of Science in Computer Science 04/2027
Biliran Province State University

SOFT SKILLS

- Communication
- Time Management
- Teamwork
- Adaptability

CERTIFICATIONS AND TRAINING

Introduction to AI Literacy and Responsible Use, Micro-Credentials Course 09/2026

PROJECTS

ShelScan
Seashell Species Identification and Edibility Classification App
- Developed a mobile application that uses Convolutional Neural Network (CNN)-based image recognition to identify selected seashell species.
- Provides species information, general edibility classifications, interactive quizzes, and shellfish advisory information.
- Technologies: Python, Flutter, TensorFlow, Keras, TensorFlow Lite, and Firebase Firestore.

CampBlazer
Camping Discovery and Trip Planning Website
- Developed a web application prototype that allows users to explore campsite listings and discover camping destinations.
- Includes campsite information, search and filtering features, and trip-planning functionality.
- Technologies: HTML, CSS, JavaScript, React.js, and Tailwind CSS
